CORE5

Discover more

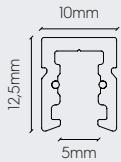

CORE5 is the first system based on CORE concept. The core is a track itself, made of a **proprietary polymer** which maintains the **mechanical and electrical features** of a standard track.

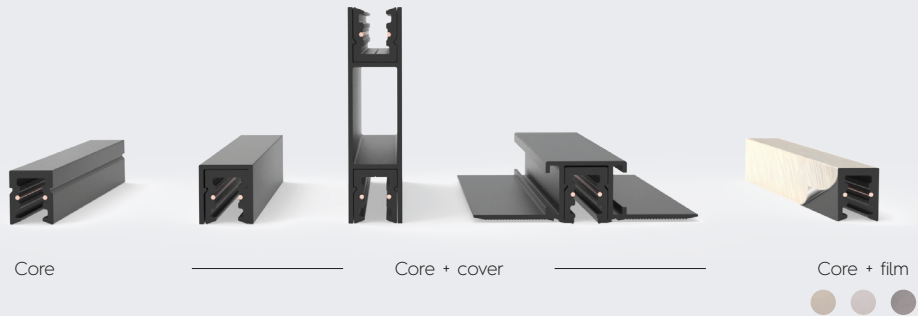

The core can be used as it is for ceiling or embedded applications, while the use of **aluminium covers** makes all the other installation types possible. Covers can be customized in colour, finishing, shape and size thus giving the maximum freedom and flexibility in all applications and **films** give an aesthetic touch to surface ones.

CORE5 main feature is the **track size which is even smaller**, thus conveying a very elegant touch to residential, retail or any other specific application where space for track installation is limited and attention to details is a must.

Tech info

1 circuit: +/- 5A/60V dc

Materials:

Core: extruded body in black polymer

Covers: aluminium

Available cover colours: black embossed / white embossed

Available film colours: ● champagne ● natural ● stainless steel

Available lengths:

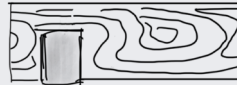

CORE5 mounting options

WOOD SHELF:

Ceiling

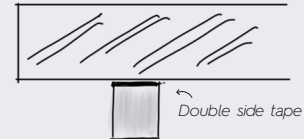

Embedded

GLASS / METAL SHELF / DRYWALL:

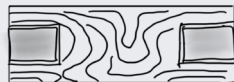

Ceiling

Inclined embedded

Side embedded
