

**CRAFTING LIGHT.
TOGETHER.**

Crafting Light. Together.

At **GEWISS LightZone**, light is an act of design shaped by expertise, responsibility and long term vision.

Six strategic drivers, one shared vision: we craft integrated lighting solutions that turn complexity into clarity, supporting professionals and end users to fulfil their needs.

From smart and connected systems to visual quality, from energy efficiency to reliable performance, we offer concrete solutions to effectively meet every design requirement.

Thanks to the combined strengths of **Performance iN Lighting**, **Beghelli**, and **Tvilight**, GEWISS LightZone brings together design, safety, and connectivity to create future-proof lighting systems.

Six strategic principles, one shared vision.

Technology & Digitalization

Technology and digitalization are at the core of our approach to light.

We bring expertise about ecosystems and connectivity, delivering smart data enabled systems that enhance performance and control, being scalable over time.

Design

Design is where advanced LED systems become future proof solutions.

We translate technology into lighting that integrates seamlessly with architecture, enhancing spaces through balance, coherence and visual quality.

Safety

Safety means reliability, performance and continuity.

From everyday operation to critical situations, functional and emergency lighting solutions are engineered to protect people, spaces and activities, without compromise.

Sustainability & Wellbeing

Lighting is conceived with deep attention to the environment and human wellbeing.

This vision takes shape through energy efficiency, system interoperability and solutions designed to enhance comfort, perception and quality of life.

Project Driven Approach

We work side by side with professionals.

A consultative, project driven approach allows us to support every phase with expertise, tools and tailored solutions, turning project requirements into effective lighting systems.

Long Term Vision

Our strength lies in industrial solidity combined with a long term perspective.

A reliable partner, capable of evolving technologies and solutions while ensuring continuity, quality and trust over time.

Protection and Safety

Founded in 1982, **Beghelli** is one of the leading Italian companies in the field of **emergency lighting**.

The company also designs, manufactures, and distributes professional lighting fixtures, smart lighting systems, photovoltaic solutions, and devices for smart home and personal safety.

In 2025, Beghelli became part of the GEWISS Group, sharing its global values of innovation, excellence, integrity and sustainability.

At the core of Beghelli's mission is a strong focus on **safety**, ensured through **reliability and high performance**.

Form and Design

For over 40 years, **Performance iN Lighting** has been active in **professional lighting**, developing integrated and reliable solutions for a wide range of applications.

In 2023, the company became part of the GEWISS Group. This step strengthened shared expertise, continuing a growth path that began in 2017 with the unification of Prisma, SBP and Spittler under a single brand, focused on design excellence.

Performance iN Lighting products have always combined **aesthetics** and **design** with **performance**, shaping the history of lighting.

Twilight

Connectivity and Intelligence

With solutions implemented in over 1,000 cities across more than 35 countries worldwide, **Twilight** is a European market leader in **smart street lighting solutions**.

Having become part of the GEWISS Group in 2024, the company is headquartered in the Netherlands, with offices in Groningen, Amsterdam, and Ahmedabad (India).

Twilight specializes in motion sensors for street lighting, controllers for outdoor lighting fixtures and centralized management software (CMS).

Thanks to advanced IoT technologies, it delivers **connected, scalable and interoperable platforms** that enhance energy efficiency, operational management and the quality of urban lighting.

A scalable connectivity platform designed to manage dynamic lighting in professional environments, supporting configurations from individual sensors to full Hub or Cloud solutions.

KIN sense

KIN sync system

KIN hub system

KIN cloud system

CityManager

CityManager is a powerful, web-based Central Management System (CMS) designed to monitor, manage and control entire outdoor lighting infrastructures from a single intuitive platform.

NuBe is Beghelli's cloud-based platform for managing and monitoring ordinary and emergency lighting systems.

GEWISS: a single partner

GEWISS, with 50 years of experience in the electrical and electronic sector, is able to offer complete and integrated solutions for your entire Sports facility, from **Installation** Solutions, **Energy** Management and Connected **Building**, up to **Lighting** Solutions and **Mobility** Solutions.

5 good reasons to choose GEWISS, the benefits of an integrated solution.

Reliability of consolidated and tested products and solutions to achieve the maximum in terms of performance and warranty over time.

Safety with solutions that embrace the entire installation system and specific products for every type of requirement, always under the banner of protection for assets and people.

Connection with systems designed and engineered to communicate with each other and always offer you the best in terms of innovation and flexibility of the system.

Sustainability of products and solutions designed to guarantee energy efficiency, respect for the environment and attention to people.

Excellence of services and solutions, designed to offer the best and to always imagine new ways to improve people's lives.
